No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1987 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 6

Number 1, January 1987

Jeanette Wasserstein, Russ Zappulla, Jeffrey Rosen, Louis Gerstman, and Donald Rock. In Search of Closure: Subjective Contour Illusions, Gestalt Completion Tests, and Implications 1

Ronald A. Yeo, Eric Turkheimer, Naftali Raz, and Erin D. Bigler. Volumetric Asymmetries of the Human Brain: Intellectual Correlates 15

Merrill Hiscock, Marcel Kinsbourne, Marilyn Samuels, and A. E. Krause. Dual Task Performance in Children: Generalized and Lateralized Effects of Memory Encoding upon the Rate and Variability of Concurrent Finger Tapping 24

H. Lee Swanson. The Combining of Multiple Hemispheric Resources in Learning-Disabled and Skilled Readers' Recall of Words: A Test of Three Information-Processing Models 41

Murray Grossman and Martha Wilson. Stimulus Categorization by Brain-Damaged Patients 55

Morris Moscovitch and Myra Radzins. Backward Masking of Lateralized Faces by Noise, Pattern, and Spatial Frequency ... 72

David Hines, Laura Jordan-Brown, and Katheryn Rossetto Juzwin. Hemispheric Visual Processing in Face Recognition 91

L. L. Morton and J. R. Kershner. Hemisphere Asymmetries, Spelling Ability, and Classroom Seating in Fourth Graders .. 101

W. Grant Willis and George W. Hynd. Lateralized Interference Effects: Evidence for a Processing Style by Modality Interaction 112

Papers to Appear in Forthcoming Issues 127

Number 2, April 1987

Gordon Winocur, Morris Moscovitch, and Dawn Witherspoon. Contextual Cuing and Memory Performance in Brain-Damaged Amnesics and Old People 129

Richard S. Lewis and N. Laura Kamptner. Sex Differences in Spatial Task Performance of Patients with and without Unilateral Cerebral Lesions 142

C. Netley and Joanne Rovet. Relations between a Dermatoglyphic Measure, Hemispheric Specialization, and Intellectual Abilities in 47,XXY Males 153

Clarissa S. Holmes. Metabolic Control and Auditory Information Processing at Altered Glucose Levels in Insulin-Dependent Diabetes 161

Loren J. Chapman and Jean P. Chapman. The Measurement of Handedness 175

Stanley Coren and Alan Searleman. Left Sidedness and Sleep Difficulty: The Alinormal Syndrome 184
Michael C. Corballis and Mark J. McNeill. The Effect of Head Turn on Auditory Asymmetry 193
Isabelle Peretz, José Morais, and Paul Bertelson. Shifting Ear Differences in Melody Recognition through Strategy Inducement 202
A. M. Mahoney and R. S. Sainsbury. Hemispheric Asymmetry in the Perception of Emotional Sounds 216
Notes and Discussion
Morris Moscovitch. Can Very Long Stimulus Exposure Durations Be Used in Reaction Time Studies of Visual Laterality? A Reply to Hardyck, Dronkers, Chiarello, and Simpson, 1985 234
Curtis Hardyck, Nina F. Dronkers, Christine Chiarello, and Gregory V. Simpson. On Preaching the Commandments of Proper Research: A Rejoinder 238
Papers to Appear in Forthcoming Issues 242

Number 3, July 1987

André Roch Lecours, Jacques Mehler, Maria Alice Parente, Luis Roberto Aguiar, Amauri Batista da Silva, Manoel Caetano, Henriqueta Camarotti, Maria Julia Castro, François Dehaut, Claude Dumais, Louise Gauthier, Jennifer Gurd, Orlando Leitão, Jayme Maciel, Sergio Machado, Roberto Melaragno, Leda Maria Oliveira, Jaime Paciornik, Wilson Sanvito, Ermelinda Santos da Silva, Maria Silifrandi, and Carmen Hierro Torné. Illiteracy and Brain Damage. 2. Manifestations of Unilateral Neglect in Testing "Auditory Comprehension" with Iconographic Materials 243
John Stirling Meyer, Yoshiki Ishikawa, Takashi Hata, and Ismet Karacan. Cerebral Blood Flow in Normal and Abnormal Sleep and Dreaming 266
Anke Bouma. Effects of Concurrent Spatial and Verbal Memory Loads on Serial Position Functions of Laterally Presented Letter Strings 295
David B. Boles. Reaction Time Asymmetry through Bilateral versus Unilateral Stimulus Presentation 321
Miriam C. Wollman and John S. Antrobus. Cortical Arousal and Mentation in Sleeping and Waking Subjects 334
James A. Diehl and Walter F. McKeever. Absence of Exposure Time Influence on Lateralized Face Recognition and Object Naming Latency Tasks 347
Papers to Appear in Forthcoming Issues 360

Number 4, October 1987

Connie A. Tompkins and Charles R. Flowers. Contextual Mood Priming following Left and Right Hemisphere Damage 361
John L. Bradshaw, Norman C. Nettleton, Lyn E. Wilson, and Catriona S. Bradshaw. Line Bisection by Left-Handed Preschoolers: A Phenomenon of Symmetrical Neglect..... 377
William W. Beatty, David P. Salmon, Nancy Bernstein, Maryann Martone, Lauren Lyon, and Nelson Butters. Procedural Learning in a Patient with Amnesia Due to Hypoxia..... 386
Richard J. Davidson, David Mednick, Edward Moss, Clifford Saron, and Carrie Ellen Schaffer. Ratings of Emotion in Faces Are Influenced by the Visual Field to Which Stimuli Are Presented 403
Y. M. Archibald. Persisting Apraxia in Two Left-Handed, Aphasic Patients with Right-Hemisphere Lesions 412
Eva Irle, Josef Kessler, Hans J. Markowitsch, and Wolfgang Hofmann. Primate Learning Tasks Reveal Strong Impairments in Patients with Presenile or Senile Dementia of the Alzheimer Type 429
Steven Z. Rapcsak, Leslie J. Gonzalez Rothi, and Kenneth M. Heilman. Apraxia in a Patient with Atypical Cerebral Dominance 450
Harold A. Sackeim and Dennis M. Grega. Perceiver Bias in the Processing of Deliberately Asymmetric Emotional Expressions 464
Michael W. O'Boyle, Fern Van Wyhe-Lawler, and David A. Miller. Recognition of Letters Traced in the Right and Left Palms: Evidence for a Process-Oriented Tactile Asymmetry 474
In Appreciation and Recognition..... 495
Papers to Appear in Forthcoming Issues 496
Author Index for Volume 6 498

Information for Contributors

Brain and Cognition publishes original research articles, case histories, critical reviews, and scholarly notes; contributions will be concerned with any aspect of human neuropsychology, other than language. Appropriate topics include movement, perception, praxis, emotion, memory, and cognition, in relationship to brain structure and function. *Brain and Cognition* will publish experimental research papers, clinical case histories, reviews, short notes (limited to under 10 pages typed), and discussion/commentary articles. Book reviews may be submitted for publication and will also be solicited; of particular interest are those book reviews that, in addition to critically summarizing a book's content, make a scholarly contribution in their own right.

Submission of Manuscripts. Manuscripts should be submitted to:

Brain and Cognition
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Cognition* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11-in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lowercase letters,[a,b], etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,[1,2], etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1980) or (Russell & Espir, 1981). If more than one paper was published by the same author in a given year, the correct style is Broca (1982a) or Broca, (1982b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Fromkin, V. 1980. *Errors in linguistic performance*. New York: Academic Press.

Kamptner, L., Kraft, R. H., & Harper, L. V. 1985. Lateral specialization and social-verbal development in preschool children. *Brain and Cognition*, **3**, 42–50.

Bryden, M. P. 1978. Strategy effects in the assessment of hemispheric asymmetry. In G. Underwood (Ed.), *Strategies of information processing*. New York/London: Academic Press.

(Use underlining for journal and book titles only.)

Proofs. Proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
